

Misty Mountain Sierra

Mighty mountains rise above the morning mists, imposing and eternal.

During this half term, we're going up in the world, visiting a hill and noticing how the weather changes. Back in the classroom, we'll use a range of maps, information books and websites to write a recount of our visit. We'll find out where the highest mountains are, learn how to use a compass and make 3-D mountain models. Inspired by the magnificent mountains of the world, we'll complete graphs showing heights, look at webcam and satellite images and create wonderful weavings. We'll also examine how mountains are displayed on a map, and build a water cycle to look at changing states of matter.

At the end of this project, we'll write stories about the Yeti and invite you to a presentation that will showcase our learning.

ILP Focus	Geography
English	Non-chronological reports, explanations, leaflets, stories
Geography	Using maps, human and physical geography
Art & Design	Weaving
Computing	Satellite mapping, using GPS devices, 2-D animation, online research
D&T	Evaluating and reflecting
Music	The Dragon Song
PE	Swimming and Dance
PSHE	Safety in the environment
Science	States of matter

Help your child prepare for their project

Climbing a mountain is an exciting adventure! Why not research one of the world's highest mountains together? You could also find out about the animals that live there and how they have adapted to the environment. Alternatively, visit the library together to find out how mountains are formed and where in the world they can be seen.
